High Efficiency
High Capacity
Combi-boilers

Smarter Living Environment Partner

Navien, a world leader in **innovation** is also the **best selling** brand of condensing combi-boilers

Two premium combi-boiler options: NCB-H Series and NFC-H Series

Both series are high efficiency and high capacity, with the NFC-H having larger heating output.

- Compact, wall hung, design up to 80% smaller than traditional boiler and tank water heaters
- Durable, energy saving stainless steel heat exchangers
- Available in natural gas or LP gas

Great residential combi warranty

Model	Labor	Parts*	Heat Exchanger**
NFC-H	1 year	5 years	10 years
NCB-H	1 year	5 years	10 years

*Refer to limited residential warranty for details.

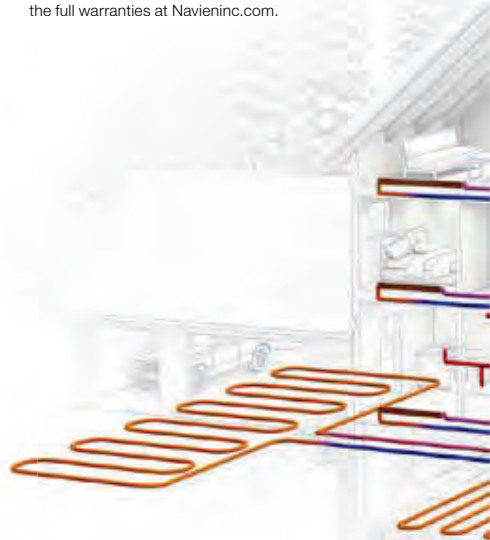

**Applies to single family residential locations.

For complete details please refer to the full warranties at Navieninc.com.

Smarter Living Environment Partner

Simply a
smarter
hot water
system for
today's
lifestyles

Endless
hot water and
home heating
comfort
for any size home
or family

Low noise

Installations in or near media rooms, recreation rooms or any living areas are possible with the quiet running Navien combi-boilers.

Compact design

Navien sleek, wall mounted combi-boilers occupy 80% less space than traditional floor standing boilers and tank water heaters.

Longer life

Navien durable, energy efficient stainless steel heat exchangers resist corrosion better than copper to provide longer life.

Energy Star

Navien high capacity, high performance, high efficiency condensing combi-boilers are proud to wear the Energy Star label.

Smarter Living Environment Partner

More innovative
reasons
to choose Navien
combi-boilers
for your energy
efficient home

Optional Wi-Fi remote control system

This add-on accessory will enable home owners with smartphones & tablets to control temperatures remotely, access usage data and receive diagnostic notifications on all Navien combi-boilers.

Optional DHW activation system

At the push of a button, the HotButton® hot water system activates the DHW heat exchanger to heat water in the supply lines to provide hot water only when needed.

Lower energy bills, easier on the planet

Navien condensing stainless steel heat exchangers recover extra heat that would be lost in non-condensing boilers. The result is a reduction in energy consumption, lower CO₂ emissions and low exhaust temperatures allowing the use of less expensive venting materials such as Schedule 40 PVC.

More savings with credits and rebates

There are a variety of energy efficiency credits and rebates available to homeowners. To learn more about options in your area, visit Navieninc.com.
