High-Efficiency Gas Furnaces

97.0% AFUE

OUR PROMISE

When you choose WeatherMaker by Carrier products, you'll quickly see why they're a smart, practical choice—affordable and built to perform.

PEACE OF MIND

The Well-Built Warranty.
Every furnace we build is covered with a 10-year parts limited warranty to the original owner of the properly registered product.* The heat exchanger is covered by a 20-year parts limited warranty.

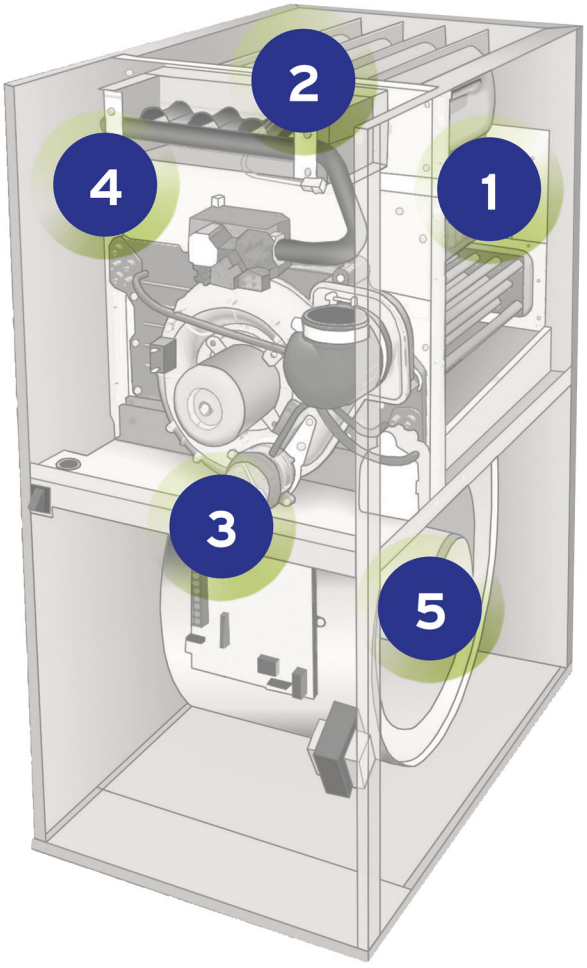

Run-tested and right for you.
Because we only feel comfortable providing you with long-lasting comfort and efficiency, only products that complete our testing with a 100% success rate make it out of the factory.

WHAT IS AFUE?

Like a car's mpg, AFUE (Annual Fuel Utilization Efficiency) is the measure of fuel efficiency for a furnace. It tells you what percentage of consumed heating fuel, on average, actually goes to heating your home. The higher the number the better, because when you waste fuel, you waste money.

Variable-Speed

Models PG97VTA and PG96VTA feature variable-speed blower motors. This technology can help save you money year-round on utility bills while being extremely quiet.
Saving money never sounded so good.

1. **Extra efficiency** – Our high-efficiency furnaces have two heat exchangers to extend the transferring of heat, getting the most out of the fuel. Our secondary heat exchanger is specially designed for lasting corrosion resistance and durability.
2. **Reliability** – The hot surface igniter is built so you can count on heating when you need it.
3. **Responsiveness** – We did get a little fancy with our advanced electronic control board for reliable activation and continuous monitoring of the furnace.
4. **Quiet and virtually draft-free** – We seal our combustion system to virtually eliminate drafts and deliver quiet operation.
5. **Blower motor options** – The broader the spectrum of speeds a blower motor can accommodate, the more efficiently and quietly the furnace can heat and circulate the air. We offer furnaces with multi-speed and variable-speed blower motors.

* Warranty period is five years if not registered within 90 days. Jurisdictions where warranty restrictions are not allowed will automatically receive a 10-year parts limited warranty. See warranty certificate for complete details, terms and exclusions.
